Supplement

FT Supplement is a display that reinterprets the wood types largely used in movie posters and newspapers. Its condensed design with a tight spacing makes it suitable for large size compositions, headlines, and logotypes. Through a variety of stylistic sets, the typeface makes it possible to generate ever-changing atmospheres and contrasts.

Name	FT Supplement
Version	1.001
Date	29.01.2022
Foundry	Formula Type
Designer	Piero Di Biase
Collaborator	Alberto Malossi
Production	Alberto Malossi
Encoding	Latin Extended
Formats	otf, woff, woff2

License

This is an agreement between the customer (hereinafter also "license owner"), the designer, and Formula Type di Piero di Biase (hereinafter "Formula Type"). By purchasing, downloading, installing, using, or otherwise handling Formula Type's digital font software (hereinafter "Fonts"), both the purchaser and the license owner accept this agreement and acknowledge that they understand and abide by its terms. If you are not the end user, but act as a payment intermediary or purchaser of the Fonts on behalf of the end user, it is your responsibility that the end user accepts and complies with this exact EULA. The acquisition of a license grants you the right to use the specified fonts as part of the content designed, produced, and published by you, on certain types of media. By obtaining a license, you do not acquire the copyright to the design or any other part of the fonts, except for the non-exclusive, non-transferable right to use the fonts for the use cases specified in this agreement, according to the specifications provided by Formula Type. All other use cases other than those specified require an additional license. Complete EULA available at www.formualtype.com/information

Unicode Ranges

Basic Latin, Latin-1 Supplement, Latin Extended A, Latin Extended B, Spacing Modifier Letters, Combining Diacritical Marks, Greek, General Puntuaction, Superscripts and Subscripts, Currency Symbols, Combining Diacritical Marks for Symbols, Number Forms, Arrows, Mathematical Operators, Miscellaneous Symbols, Mathematical Alphanumeric Symbols.

Opentype

aalt (Access All Alternates)
locl (Localized Forms)
calt (Contextual Alternates)
ccmp (Glyphs composition/Decomposition)
subs (Subscript); sinf (Scientific Inferiors)
numr (Numerators); dnom (Denominator)
frac (Fractions); ordn (Ordinals)
pnum (Proportional Figures);
case (Case Sensitive Forms)
dlig (Discretional Ligatures);
liga (Standard Ligatures)
zero (Slashed Zero)
ss01 (Alternate Ss); ss02 (Alternate Zz); ss03 (Alternate t)
ss04 (Alternate u); ss05 (Shortened descenders); ss06 (Raised descenders)
ss07 (Rounded punctuation, accents); ss08 (Thin punctuation, symbols, accents)

This new method overcame many of the shortcomings of woodblock printing. Rather than manually carving an individual block to print a single page, movable type printing allowed for the quick assembly of a page of text. Furthermore, these new, more compact type fonts could be reused and stored. Wang Zhen used two rotating circular tables as trays for laying out his type. The first table was separated into 24 trays in which each movable type was categorized based on a number corresponding with a rhyming pattern. The second table contained miscellaneous characters.
