

**Supplement**

FT Supplement is a display that reinterprets the wood types largely used in movie posters and newspapers. Its condensed design with a tight spacing makes it suitable for large size compositions, headlines, and logotypes. Through a variety of stylistic sets, the typeface makes it possible to generate ever-changing atmospheres and contrasts. A sub-family is currently being developed to add a wider range of uses to the family.

**Bi Sheng (990–1051) of Song dynasty also pioneered the use of wooden movable type around 1040 AD, as described by the Chinese scholar Shen Kuo (1031–1095). However, this technology was abandoned in favour of clay movable types due to the presence of wood grains and the unevenness of the wooden type after being soaked in ink. In 1298, Wang Zhen,**

**a Yuan dynasty governmental official of Jingde County, Anhui Province, China, re-invented a method of making movable wooden types. He made more than 30,000 wooden movable types and printed 100 copies of Records of Jingde County, a book of more than 60,000 Chinese characters. Soon afterwards, he summarized his invention in his book A method of making**
